

Action: 2 **The Dublin Airport Stakeholders Forum will provide an effective forum for the discussion of all matters concerning the development and/or operation of the airport that have an impact on users of the airport and on those living and working in the surrounding area. It will also act as a forum for how complaints are addressed.**

Rationale As a major international airport, Dublin Airport tends to dominate the local and regional economy and the environment of the area in which it is situated. The costs of such development tends to be borne by the local environment and the residents and communities surrounding the airport. To resolve conflicts of interest through dialogue and better understanding on all sides.
